

UTTERMOST

Concrete

Glass-reinforced concrete is crafted from multiple layers of high-strength glass fibers and concrete to create a durable and lightweight composite. Concrete is sealed to add extra protection against weather, liquids, and damage.

Care & Maintenance

- Clean using a damp cloth and mild soap.
- Avoid the use of acidic or abrasive cleaners.
- Avoid placing heavy objects that could cause cracking or hitting the tabletop edges.
- Avoid excess water sitting on concrete surfaces.
- Non-structural hairline cracks can develop over time, adding to the character and uniqueness of the piece. To help prevent cracking, staining, and discoloration, periodically resealing concrete is recommended.
- Store in a dry area or use protective covers when not in use.
